

## Motor Coach Industries - J and D Style Coaches

Modified from one of our other transportation lighting systems, the FLL series is currently a custom designed lighting system for the motor coach industry. The FLL series is produced in Canada and the USA for MCI's J and D Coaches.

LED Smart has worked with MCI since 2008, in 2014 becoming the main, sole source supplier for MCI. Signing a two year supply agreement, LED Smart supplies the lighting products for all of MCI's production lines in Winnipeg, MB; Pembina, ND and Louisville, KY.
